

## LAUNCH YOUR CT TECH CAREER WITH UPMC

UPMC is proud to partner with the Community College of Allegheny County (CCAC) to bring more skilled CT Technologists to our region. Get paid, hands-on experience as a CT Tech with UPMC while you complete classes at CCAC — at no cost to you!

As a CT Tech, you'll use computerized tomography (CT) scanners to capture an in-the-moment look at patients' internal health through 3-D images. These images help medical professionals identify and locate any abnormalities, leading to informed diagnoses. Through UPMC's partnership with CCAC, you'll learn how to prepare patients for scans, prepare and operate innovative CT equipment, and interpret radiological images.

**Through UPMC's new program for the upcoming CCAC CT class, accepted students who commit to a two-year work agreement with UPMC will have access to:**

- A full-tuition discount for the CT Tech program, paid by UPMC directly to CCAC
- Paid on-the-job training and mentorship from educated and skilled CT Techs
- Up to 80 hours of at-work time in your first six months to complete your online classes
- A \$10,000 sign-on bonus for new UPMC employees with a two-year work commitment
- UPMC's premier benefits package, designed to support your total well-being — physically, emotionally, and financially
