

CCAC Wireless Access- Mac 10.14.1

This document provides instructions on configuring CCACwireless using macOS Mojave for Mac.

1. On the top-right side of the screen, click on the **Network Icon**.

- You will see a list of networks that you can connect to.

2. Double click the **CCACwireless** network.

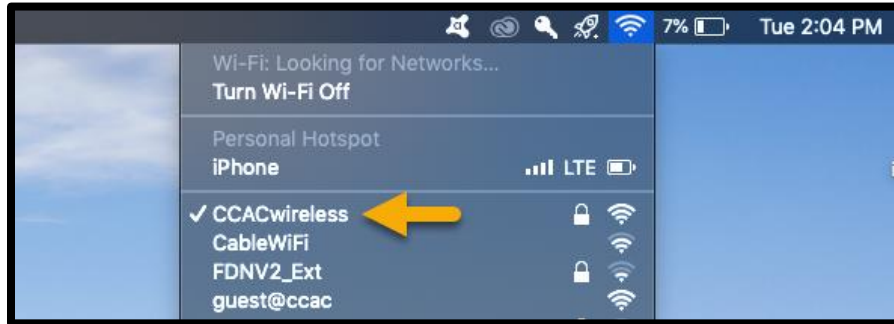

3. Type in your **CCAC Username** and **Password**, then click **Join**.

- When the network connection screen clears, and the wireless bars are solid, you are connected to CCACwireless.
- If you received a message saying, "Could not connect to CCACwireless", try re-entering your CCAC username and password again.

4. To confirm a successful connection to CCACwireless:
 - Click on the **Network Icon** at the top-right of the screen.
 - If you have a check mark next to **CCACwireless**, you have successfully connected to the wireless network.

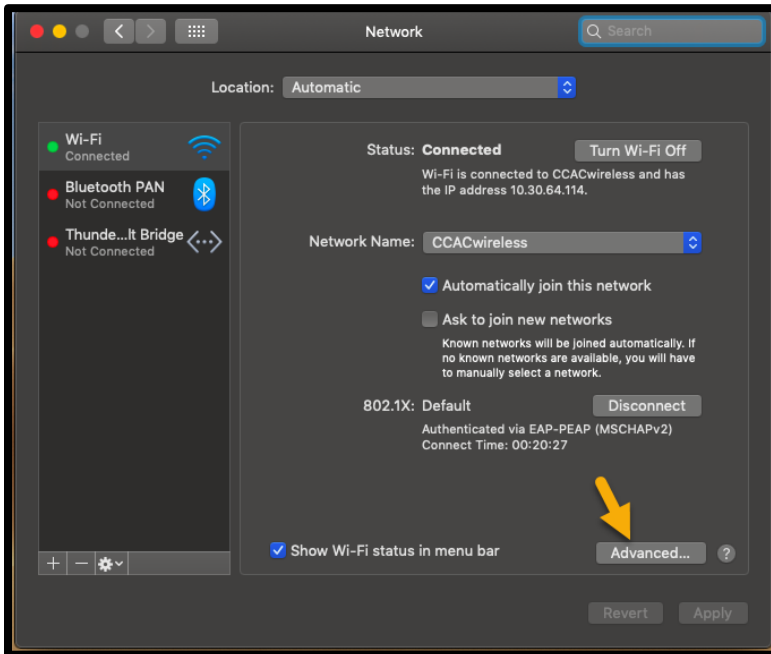

If you experience an issue connecting to CCACwireless, follow these instructions to forget the network.

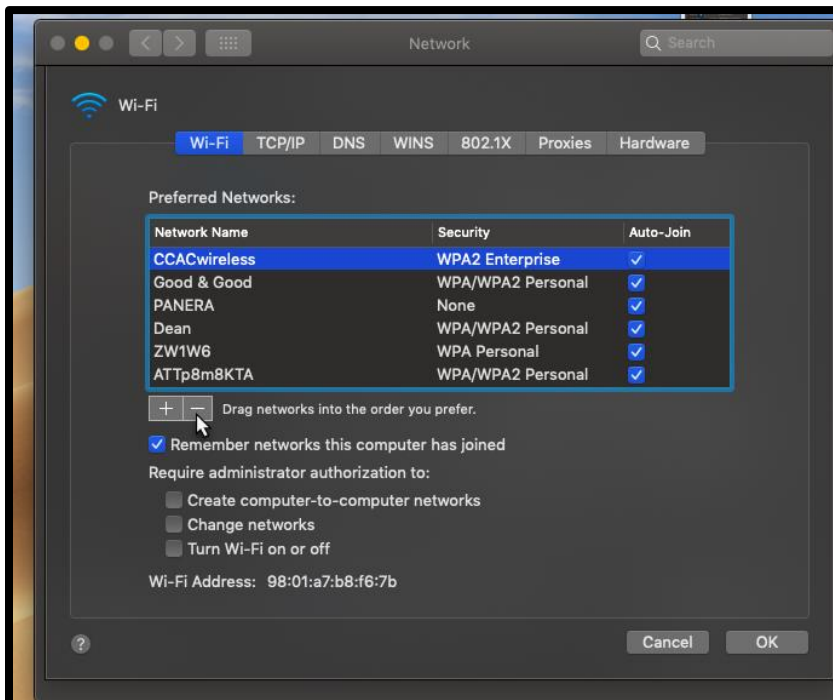

1. Click on the **Network** icon at the top-right of the screen, then click **Open Network Preferences**.

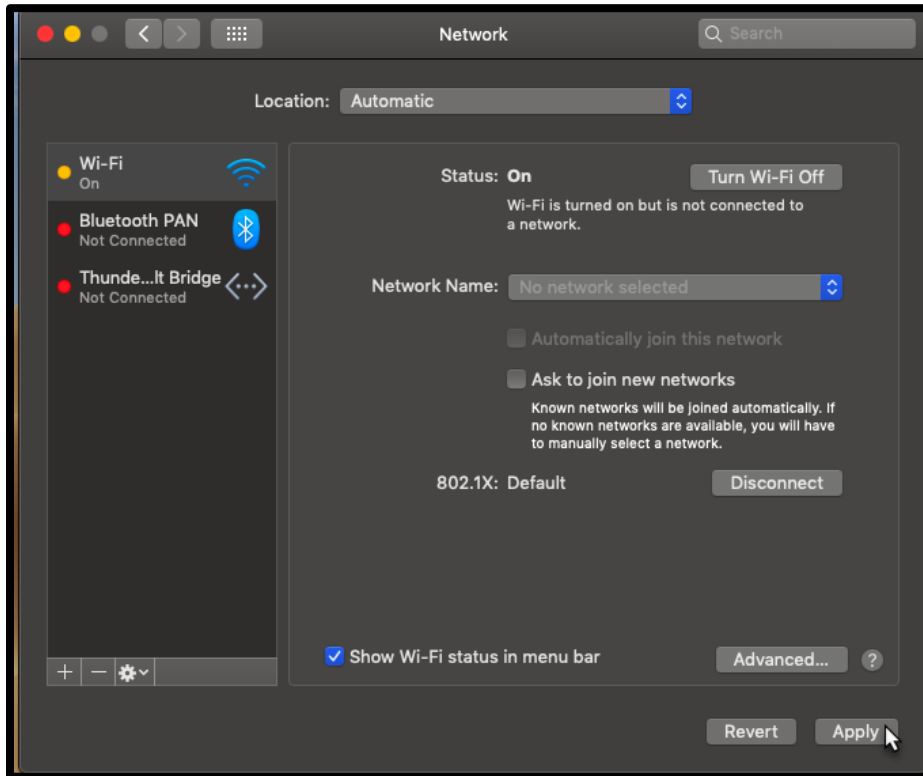

2. Click the **Advanced** button on the bottom-right of the window.

3. Click **CCACwireless** under *Preferred Networks* to highlight it, click the minus (-) button, then click **OK**.

4. Click **Apply** on the bottom-right of the Network window.

- **NOTE:** Following completion of these steps, retry the steps at the beginning of this document to connect to CCACwireless.
