Why IMT?

- To meet manufacturing firms’ needs to upgrade the skills of incumbent and entry-level workers
- IMT on-the-job training and related instruction are relevant in wide-ranging manufacturing settings and can be customized to unique needs
- To develop a sustainable way to build a workforce and retain employees
- Apprenticeships are “learn while you earn” programs that reduce employer costs, improve operations and lead to a well-skilled and diverse workforce

Here’s how it works:

CCAC conducts a Pennsylvania registered IMT Apprenticeship Program. It is a hybrid program that includes classroom time, online learning modules and on-the-job training assignments. The total learning experience consists of 3,000 hours—264 hours of coursework and 2,736 hours of on-the-job-training, generally scheduled over an 18-month period.
